

To whom it may concern: Thank You~

My name is E L and a few years ago while I was uninsured I received a hernia repair operation I couldn't have otherwise afforded and would have went without if it wasn't for Project Access.

Shortly after the surgery I went back to school, got married, got a good job, and have been living a healthy and active life. When I have time to reflect on it, I find that I owe some of this steady stream of good graces to Project Access and that I never really expressed my gratitude properly.

The truth is, I don't even know who to thank - Project Access is obviously fueled by the support of many caring people.

I thought, if needed or wanted, I could volunteer my services as a graphic & web designer. If PA needs help with a website, posters, flyers, logos, business cards & other marketing materials, etc. - I would be happy and proud to help out pro-bono.

If you don't need any work like this right now, feel free to save my contact information and contact me *anytime* in the future that your organization would need help. I have been wanting to say Thank You for a long time.

Thank you for all you do,

E L
